

FATO 2025 Sustainability Report

1. FATO Promises that all operations comply with local laws and sustainable development, and meet the internationally recognized standards of environmental protection and social responsibility, becoming a good company that creates maximum shareholder rights, takes care of employees, and fulfills social responsibilities.
2. We will create a diverse and dynamic working environment through various education, training, and activities related to company operation management and environmental safety and hygiene.
3. Through ISO14001 environmental management system verification, adhering to the principle of "pollution prevention and continuous improvement", we aim to improve resource utilization efficiency, avoid resource waste, ensure that all processes, products, and services comply with regulations and other requirements, and effectively achieve industrial waste reduction and pollution reduction.
